CHEMISTRY REVISION GUIDE

Atomic Mass & Number: $Z = \text{\#protons}$, $A = p + n$

- Law of Conservation of Mass: Total mass of reactants = Total mass of products
- Reaction Types: Combination, Decomposition, Displacement, Double Displacement, Redox
- pH Scale: Acid <7 , Neutral = 7, Base >7
- Electrolysis: Using electric current to break compounds
- Periodic Table Tips:
 - Groups = vertical, similar properties
 - Periods = horizontal, properties change gradually
- Chemical Bonding:
 - Ionic $\rightarrow$ metal + non-metal
 - Covalent $\rightarrow$ non-metal + non-metal
 - Metallic $\rightarrow$ metal + metal
