

CLASS 9th
MATHS PRACTISE SHEET

A. Number System

1. Find the LCM and HCF of 120 and 144.
2. Simplify: $(2^3 \cdot 3^2)^2 / (2^2 \cdot 3)^3$

B. Algebra

1. Factorize $x^2 + 5x + 6$
2. Factorize $8x^3 + 27$

C. Geometry

1. In right triangle, hypotenuse = 13 cm, one side = 5 cm. Find the other side.
2. Find the measure of each angle in a triangle if angles are in ratio 2:3:4

D. Coordinate Geometry

1. Find distance between (2,3) and (7,8)
2. Find midpoint of (-1,4) and (5, -2)

E. Mensuration

1. A cylinder has radius 7 cm, height 10 cm. Find its SA and Volume.
2. A cone has radius 5 cm, height 12 cm. Find slant height, SA, Volume.

F. Statistics & Probability

1. Find mean, median, and mode for: 5, 8, 12, 5, 20
2. A dice is rolled. Find probability of getting a prime number.

G. Linear Equations

1. Solve: $2x + 3y = 12, 4x - y = 5$
